Newcastle upon Tyne, UK | Open to roles across the UK | 9108975263 | yash04988@gmail.com

Portfolio: yash04988.github.io/portfolio | LinkedIn: linkedin.com/in/yashwanthmahesh-9b592a340

PROFILE

Newcastle-based MSc Operations, Logistics and Supply Chain Management graduate (Newcastle University Business School) with a First Class BBA and hands-on UK operational leadership. Promoted to Shift Leader in a high-volume restaurant, balancing stock availability, changing demand, waste and staffing in real time. Dissertation research on how supply chain collaboration improves agility and resilience in UK automotive. Seeking a graduate or entry-level role in supply chain analysis, planning, procurement, inventory or logistics.

KEY SKILLS

- **Planning & inventory:** demand and supply planning, stock control, replenishment, stock rotation (FIFO), waste reduction
- **Supply chain:** supply chain analysis, procurement fundamentals, supplier relationship management, supplier risk, resilience, logistics management
- **Operations & leadership:** shift leadership, staff deployment, bottleneck resolution, staff training, food safety and compliance
- **Tools & analysis:** Microsoft Excel, Tally ERP 9, data analysis, operational reporting

EDUCATION

MSc Operations, Logistics and Supply Chain Management | Newcastle University Business School — **Aug 2025 – Aug 2026**

BBA, Finance & Human Resource Management | SBRR Mahajana First Grade College, University of Mysore — **Oct 2021 – Jun 2024**

First Class

PROFESSIONAL EXPERIENCE

Shift Leader (promoted from Team Member) | KFC UK & Ireland · Metrocentre, Gateshead, UK — **Dec 2025 – Present**

- Lead kitchen and front-of-house teams through peak trading, prioritising tasks to hold service standards.
- Monitor stock through each shift and manage replenishment, stock rotation and inventory-control procedures to maintain availability.
- Match food preparation to real-time customer demand, balancing availability against waste and stock usage.
- Clear operational bottlenecks by reallocating staff between stations and re-sequencing priorities.
- Receive and organise deliveries in line with stock-handling and food-safety procedures.
- Track waste and product usage, identifying improvements to preparation and stock decisions.
- Train new team members on procedures, food safety and customer service; escalate issues to management where needed.

SELECTED SUPPLY CHAIN PROJECTS

Supply Chain Collaboration & Agility in UK Automotive — **2026**

MSc dissertation | Newcastle University

- Investigated how collaboration improves agility and resilience across UK automotive supply chains.
- Examined disruption, supplier relationships, information visibility and supplier dependency.

Decarbonisation Assessment: A.P. Moller-Maersk — **2025–2026**

Newcastle University

- Evaluated decarbonisation challenges across ocean shipping, terminals and logistics.
- Weighed trade-offs between technology, cost, infrastructure, reliability and long-term sustainability goals.

CERTIFICATIONS

- Tally ERP 9 Certification — business accounting and ERP foundation
