PROFILE

MSc Operations, Logistics and Supply Chain Management graduate from Newcastle University Business School with a First Class BBA and hands-on UK operations experience. Promoted from Team Member to Shift Leader at KFC Metrocentre, supporting stock availability, waste control, team deployment and service delivery through peak demand. My MSc research focused on supply chain collaboration, resilience and agility in the UK automotive industry. I am targeting graduate and entry-level roles across supply chain analysis, planning, procurement, inventory, logistics and operations.

PROMOTED	MSc	UK OPS	FIRST CLASS

SKILLS

CORE FOR TARGET ROLES

Supply chain analysis
Demand planning
Supply planning
Inventory control
Procurement
Logistics
Operations
Supplier risk
Supply chain resilience
Demand forecasting

EXPERIENCE

Shift Leader - promoted from Team Member Dec 2025 - Present

KFC | Metrocentre, Gateshead, UK

- Lead and support team members across kitchen and front-of-house operations during busy trading periods, helping maintain workflow and service standards.
- Monitor stock availability during shifts and support replenishment, stock rotation and inventory-control procedures to maintain product availability.
- Coordinate food preparation with changing customer demand, balancing service requirements with waste reduction and efficient use of stock.
- Identify operational bottlenecks during peak periods and redeploy team members between stations to keep service moving efficiently.
- Support delivery handling and stock organisation while following food-safety, stock-handling and operational procedures.
- Train and support new team members and handle day-to-day customer or operational issues, escalating to management where required.

ACADEMIC PROJECTS

MSc Dissertation - Supply Chain Collaboration & Agility

2026

Newcastle University Business School

- Investigated how collaboration between organisations can strengthen agility and resilience across UK automotive supply chains.
- Analysed the 2025 Jaguar Land Rover cyber incident as an example of how disruption at a major manufacturer can cascade through dependent suppliers.
- Assessed the collapse of Britishvolt to examine the limits of partnership announcements without committed demand and secured financing.
- Developed recommendations around supplier collaboration, information visibility, trust and resilience in complex automotive supply networks.

Decarbonisation Assessment - A.P. Moller-Maersk

2026

Newcastle University Business School

- Evaluated decarbonisation challenges across Maersk's ocean shipping, terminal and logistics operations.
- Considered cost, technology, infrastructure and network constraints affecting the transition toward lower-carbon logistics.
- Assessed how sustainability targets interact with operational reliability, customer requirements and long-term supply chain strategy.

CAREER FOCUS

Target roles: Supply Chain Analyst, Demand Planner, Supply Planner, Inventory Analyst, Procurement Analyst, Logistics Coordinator and Operations Graduate.

Open to graduate and entry-level opportunities across the UK and internationally.
